SUMMARY

Senior Software Engineer with 8+ years of pragmatic, end-to-end product delivery and designing scalable SDLC automation, AI workflows, and developer productivity systems.
Looking to deepen my impact in AI infrastructure, DevEx, and cross-team platform engineering.

EXPERIENCE

Senior Full-Stack AI Engineer at Check Point 2021 - Today

- **Full-Stack:** Shipped enterprise security features (React, Node.js) used by thousands of clients.
- **AI Code-Review:** Architected and deployed Gen-AI flows (RAG, LLM-as-a-Judge, Skills) cutting code-review cycles by 50-90%. Built continuous alignment loops for evaluation maintenance.
- **SDLC Automation:** Transformed manual processes into autonomous CI/CD pipelines with LLM-APIs, Jira, GitLab, Teams, AWS. Reduced manual effort by ~90%.
- **AI Tooling & DevEx:** Built productivity tools adopted and accelerated by 50+ engineers.
- **Quality & Observability:** Built automated investigation workflows, reducing troubleshooting overhead across teams by 80%.
- **Architecture & Performance:** Identified and resolved core platform bottlenecks, boosting execution efficiency by >95% in critical core modules.
- **Leadership:** Mentored 20+ engineers on system design and DevEx. Established standardized Agent Skills across repositories. Rated top performer (5/5) for cross-team impact.

Full-Stack Developer at Round Trip 2020 - 2021

Developed cloud-based tourism and enterprise management platforms.

Full-Stack Developer at Root Networks 2019 - 2020

Established core security system architecture (maps, data, cyber-actions).

Product Manager & Planning Officer at IDF 2013 - 2018

Led teams responsible for IDF reserve platform and command strategic planning.

SKILLS

* **AI-Driven SDLC:** LLM-APIs, RAG Context Injection, Practical GenAI Integrations, Agent Skills, Automated Code Reviews, Dev Tools, Eval Pipelines, LLM-as-a-Judge.
* **Core Stack:** JavaScript, TypeScript, React, Node.js, Python, SQL, MongoDB, AWS, GCP.
* **Platform & DevEx:** CI/CD Pipelines, System Observability, Developer Productivity Tools.
* **Approach:** System Design, Impact-Driven, Production-Grade, ROI Thinking, Cross-team Impact.

EDUCATION

Computer Science - Open University of Israel

Full-Stack Bootcamp - Coding Academy
